92.6% ECFP4-unreachable

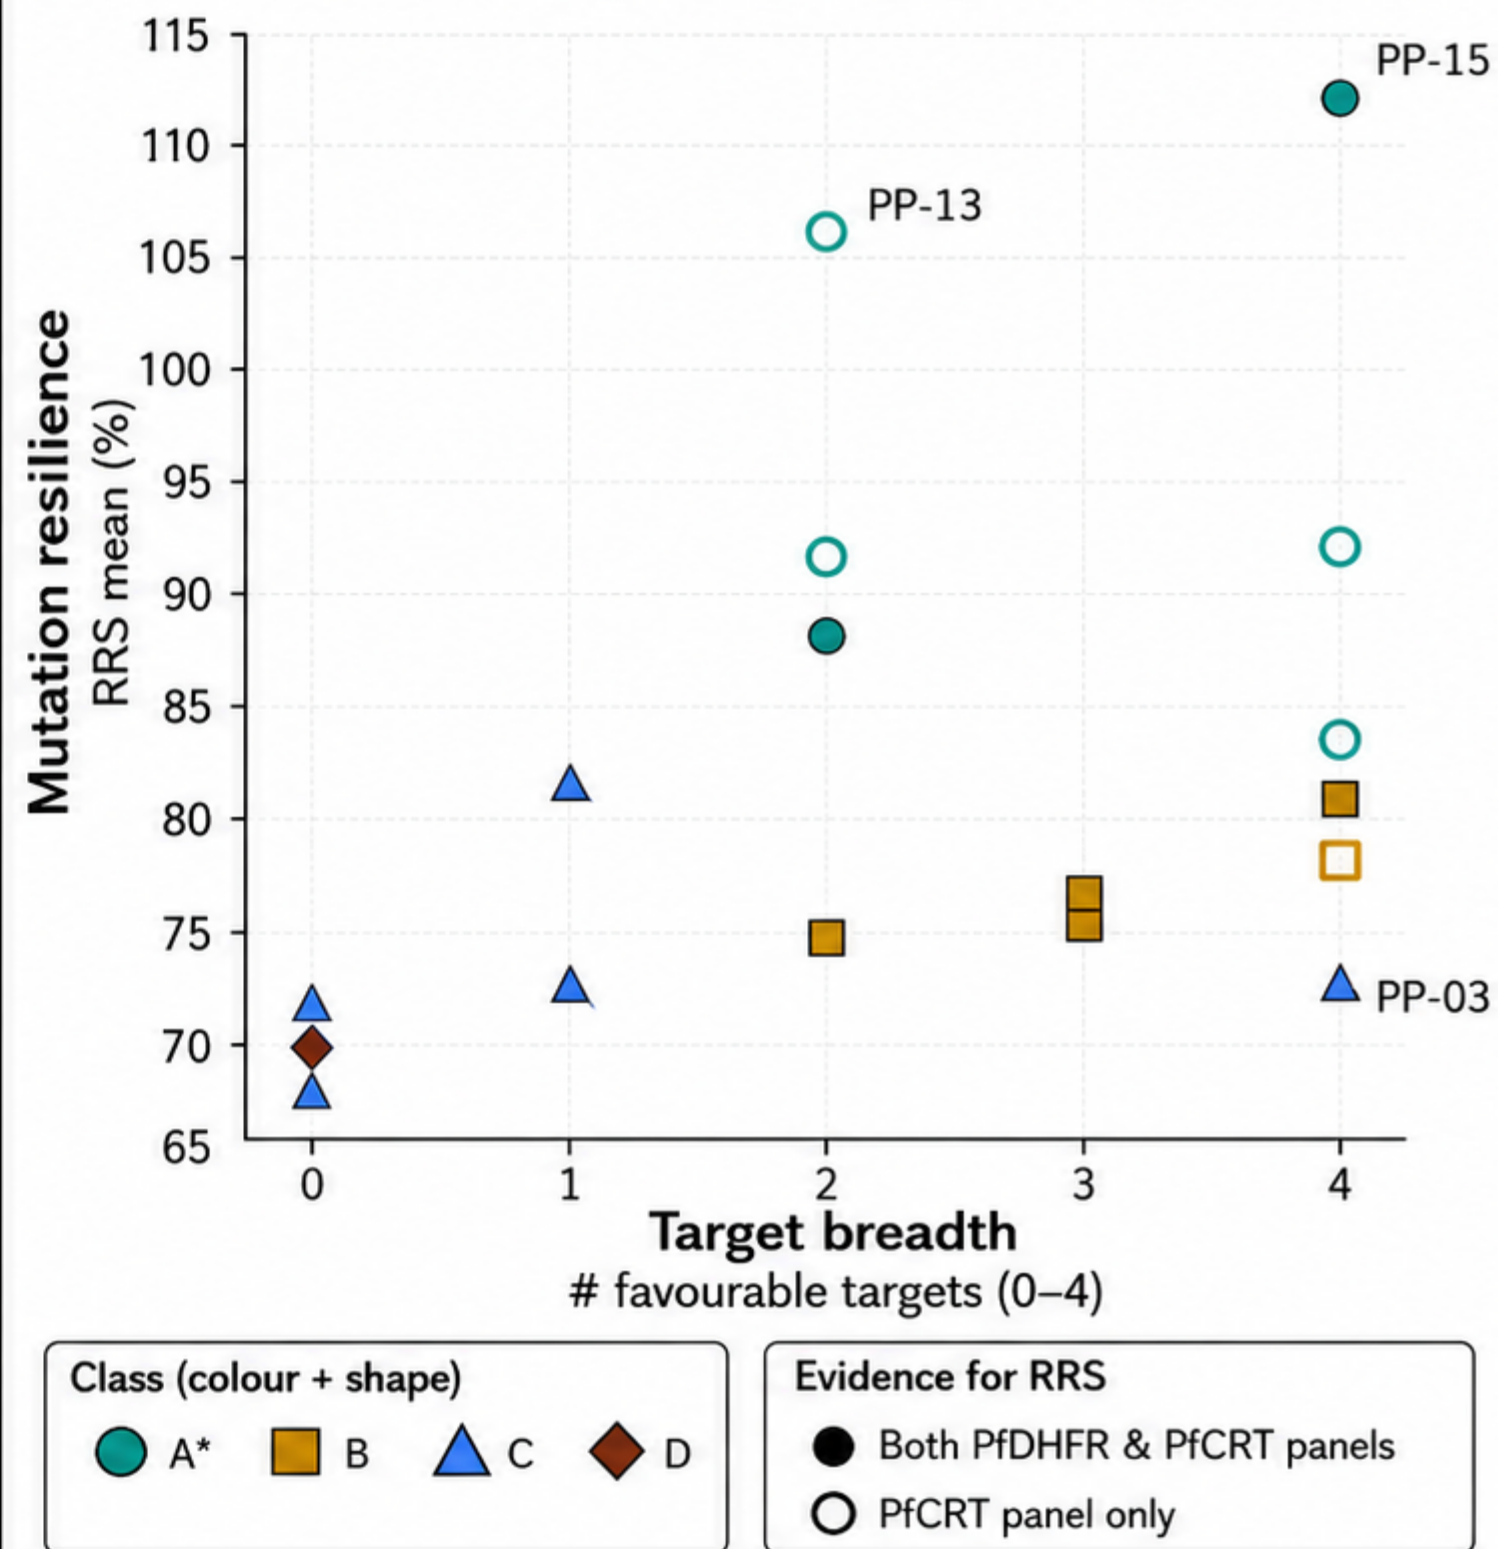

17 × 4 = 68 docked pairs

Targets		Resistance mutations (RRS panel)
1 PfDHFR (7F3Y) co-crystallized methotrexate anchor		N51I, C59R, S108N, I164L
2 PfCRT‡ (6UKJ) Y01 membrane cavity		K76T, K76A
3 PfClpP (2F6I) catalytic triad anchor		— (no RRS panel)
4 PfATP4‡ (9N10) conserved ATPase machinery anchor		— (no RRS panel)

‡ proxy anchor

Breadth ≠ resilience

Computational prioritisation from docking. No measured potency, target engagement, or resistance circumvention.
